

The B6 seat is supplied either bottom or side mounted. To fit Tillett adjustment runners to the bottom mounted version, you would need the TK5 fitting kit, as the runners have to be spaced away from the lower seat surface. The side mount version can use brackets PTBi, PTBO, TBFIA, STBi, STBO, and Elise brackets EBR, EBR 17+, EBS, EBP. These brackets have a 2° from vertical angle, which matches the side of the seat. Brackets which do not match this angle will unduly stress the composite.
